Shiftless & Carryless Collatz Models

Extraction of the Sierpiński Gasket and Emergent Chaos via Redundant Binary Representation

Hiroshi Harada — April 4, 2026

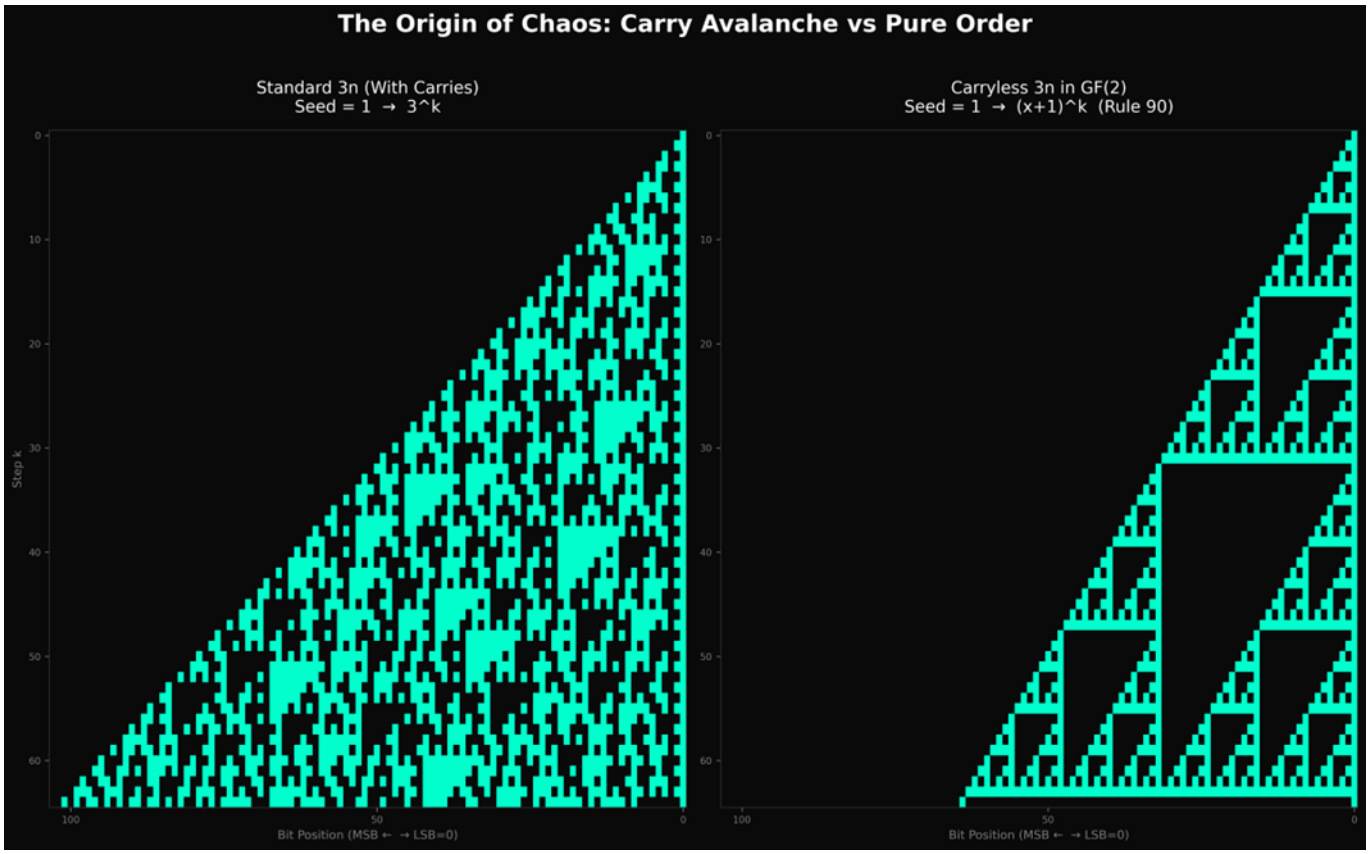

Figure 1. The Origin of Chaos: Carry Avalanche *vs* Pure Order.
Left: Standard 3^n (with carries).
Right: Carryless 3^n in GF(2).
Carry propagation destroys the fractal, while carryless arithmetic reveals the pure Sierpiński gasket.
